Art Unit: 1633

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 54-56 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no basis in the application as filed for the lack of a length recitation in claim 54.

Claims 54-56 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for oligonucleotides of 8-100 nucleotides length, does not reasonably provide enablement for nucleotides of any length greater than 100 nucleotides or less than 8 nucleotides length. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. The application as filed does not provide support for the use of oligonucleotides that are not in the range of 8-100 nucleotides length.

Claims 42-58 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is repeated for reasons already of record (e.g., Office action mailed March 22, 2001, paragraph bridging pages 1-2). Applicants' arguments (paper no. 13, pages 3-4) and the declaration by Dr. Krieg (submitted July 25, 2001) and the seven Exhibits attached to that declaration are not persuasive because the arguments, declaration, and exhibits do not make a connection between CpG oligonucleotide administration and the specific effect recited in the claims (*i.e.*, a Th2 to Th1 immune response).

Claim 42 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 44. When two claims in an application are duplicates or else are so close in content that they both cover the same

Art Unit: 1633

thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (703) 308-0296. The fax phone number for Examiner Martinell's desktop workstation is (703) 746-5162. The examiner works a flexible schedule and can be reached by phone and voice mail. Alternatively, a request for a return telephone call may be e-mailed to james.martinell@uspto.gov. Since e-mail communications may not be secure, it is suggested that information in such requests be limited to name, phone number, and the best time to return the call.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah R. Clark, can be reached on (703) 305-4051. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
